

DOLAI RAJESH KUMAR

DevOps Engineer | Multi-Cloud & Automation Specialist

Hyderabad, India • rajeshprabhakar2000@gmail.com • +91 7287839925 • [linkedin.com/in/dolairajeshkumar](https://www.linkedin.com/in/dolairajeshkumar) • github.com/dolairajeshkumar

PROFESSIONAL SUMMARY

Results-driven **DevOps Engineer** with hands-on experience architecting automated CI/CD pipelines, scalable Kubernetes clusters, and resilient multi-cloud infrastructure across **AWS, Microsoft Azure**, and **Google Cloud Platform (GCP)**. Proficient in Infrastructure as Code (**Terraform, Ansible**), container orchestration (**Docker, Kubernetes/EKS/AKS/GKE**), and SRE observability (**Prometheus, Grafana**). Demonstrated expertise in accelerating software delivery cycles, ensuring robust high availability for containerized services, and enforcing DevSecOps governance across multi-environment cloud setups.

TECHNICAL SKILLS

Multi-Cloud & Infrastructure: AWS (EC2, S3, EKS, RDS, VPC, IAM, Route 53, CloudWatch, Lambda), Microsoft Azure (VMs, VNet, AKS, Blob Storage, Azure Monitor), Google Cloud (Compute Engine, GKE, Cloud Storage, VPC, Cloud Operations)

Containers & Orchestration: Docker, Kubernetes (EKS, AKS, GKE), Helm, Multi-stage Builds, Container Security, HPA, Ingress Controllers

CI/CD & Automation: Jenkins (Declarative Pipelines), GitHub Actions, Azure DevOps Pipelines, Maven, SonarQube, ArgoCD / GitOps

Infrastructure as Code (IaC): Terraform (Multi-Cloud Modules & Remote State), Ansible (Playbooks & Roles), CloudFormation

Observability & SRE: Prometheus, Grafana, Alertmanager, AWS CloudWatch, Azure Monitor, GCP Operations, SLIs/SLOs, MTTR Optimization

Security & DevSecOps: SonarQube Quality Gates, Trivy Vulnerability Scanning, IAM Least Privilege, SSL/TLS, Secrets Management

OS & Scripting: Linux (Ubuntu, RHEL), Bash Scripting, Python (Automation), Nginx Reverse Proxy

Version Control & Methods: Git, GitHub, Gitflow Branching, Pull Request Reviews, Agile/Scrum

PROFESSIONAL EXPERIENCE

Associate Software Engineer (DevOps & Cloud) • CW Suite India Pvt Ltd

June 2024 – Present

Retail ERP/POS SaaS • Hyderabad, India • Environment: AWS, Azure/GCP, Jenkins, Docker, Kubernetes, Terraform, Ansible, Prometheus, Grafana, Git

- CI/CD & Release Automation:** Designed and implemented declarative Jenkins CI/CD pipelines for microservices, automating build, testing, and deployment stages to enable seamless and predictable production releases.
- Cluster Management & High Availability:** Orchestrated containerized workloads using Docker and Kubernetes on AWS, configuring Horizontal Pod Autoscaling (HPA) and ingress controllers to ensure robust service availability under active user traffic.
- Infrastructure as Code (IaC):** Standardized infrastructure provisioning using modular **Terraform** and **Ansible**, automating multi-environment infrastructure deployment while eliminating configuration drift across teams.
- SRE & Observability:** Established full-stack monitoring using **Prometheus and Grafana** dashboards; defined SLIs/SLOs for latency and error rates and configured automated alerts to accelerate Mean Time to Resolution (MTTR).
- DevSecOps Integration:** Integrated SonarQube static code analysis with quality gates into build workflows, preventing bugs, code vulnerabilities, and technical debt from reaching production environments.

FEATURED PROJECTS

End-to-End DevSecOps CI/CD Automation Platform

Personal / Production Simulation

Tech Stack: Jenkins, GitHub Actions, Docker, SonarQube, AWS EC2/S3, Maven, Slack, Trivy

- Engineered an automated, webhook-driven CI/CD pipeline, optimizing build and test feedback loops through parallelized execution stages and Docker layer caching.
- Implemented container security scanning using Trivy and enforced SonarQube quality gate thresholds prior to pushing Docker images to registry.
- Built automated blue/green deployment strategy with instant health-check verification and automated rollback capabilities to ensure zero-downtime releases.
- Integrated real-time Slack and email notification webhooks providing build statuses, test coverage reports, and security alerts to the engineering team.

Cloud Infrastructure Provisioning & Resilient Microservices Deployment

Cloud & IaC Project

Tech Stack: AWS (VPC, EC2, S3, IAM, CloudWatch), Multi-Cloud (Azure/GCP), Terraform, Docker, Nginx, Linux, Bash

- Provisioned secure, isolated cloud infrastructure from scratch using version-controlled **Terraform** modules (custom VPC/VNet, public/private subnets, NAT Gateways, security groups).
- Containerized Java Spring Boot microservices using optimized multi-stage Dockerfiles and deployed them behind an Nginx reverse proxy on cloud instances.
- Implemented centralized logging and alerting via CloudWatch and cloud monitoring alarms and SNS topics, triggering automatic notifications on critical thresholds.
- Authored robust Bash automation scripts for routine server maintenance, log rotation, and automated storage snapshot backups.

EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA) • Aurora's PG College, Hyderabad

Graduated: 2023

Certifications (Recommended / In Progress): AWS Certified Solutions Architect – Associate • Microsoft Certified: Azure Administrator (AZ-104) / Fundamentals • Google Cloud Associate Cloud Engineer • Certified Kubernetes Administrator (CKA)
